Profil

I am an aspiring data analyst with a solid foundation in data processing and analysis using Python, Microsoft Excel, and Google Spreadsheet. Focused on business intelligence applications, I am skilled at transforming data into actionable insights to support better business decision-making. With fundamental experience in data management and strong analytical abilities, I am committed to further developing my skills and applying them effectively in a dynamic corporate environment

Main Abilities

I possess strong skills in data analysis using Python, enabling me to extract valuable insights that support data-driven business decisions. I have experience in business intelligence, including analyzing trends and performing cohort analysis to understand customer behavior and segment patterns.

Experience

Salesperson Arofah Kebab   Nov 2023 - Juni 2024

- Conducted inventory checks and reported stock status for meat, kebab sheets, sauces, vegetables, and bread.
